

MA DOCTORS ARE TAKING A STAND —JOIN US

It's time to put patients first, not executives' paychecks.

WHAT'S HAPPENING IN OUR HOSPITALS?

Boston's top hospital executives rake in nearly \$15 million combined, while frontline doctors are struggling to pay rent and keep up with rising costs.

Hospitals are dangerously understaffed, leaving patients to endure growing wait times due to a lack of nurses, doctors, & other front-line healthcare workers

Unsafe working conditions are putting patients at risk—hospitals are dealing with dwindling resources needed to repair crumbling infrastructure

Doctors are burnt out and overworked, leading to serious risks for both providers and the patients who depend on them.

#PuttingPatientsFirst with S.899 and H.1398

We're fighting for legislation that will limit hospital executive pay in Massachusetts and reinvest those funds into patient care—ensuring that resources go where they're needed most: improving hospital conditions, staffing levels, and quality patient outcomes.

S.899 and H.1398 will ensure:

- ◆ No more million-dollar executive paydays while patients suffer.
- ◆ No more overworked and underpaid doctors struggling to provide quality care.
- ◆ No more corporate greed in our hospitals.

Doctors For Massachusetts
#PuttingPatientsFirst

THIS FIGHT IS URGENT

Corporate greed in our healthcare is diminishing the quality care patients deserve and need. And it's leaving frontline health workers in distress. We're fed up.

Now, doctors throughout Boston are teaming up to ensure that the healthcare system across the commonwealth is centered on quality patient care.
